

BIG DIFFUSORS 3D WOOD PANEL

€ 265.00

Control of low frequencies in audio rooms is always essential. Absorption of this energy is successful when the adequate solution is found. europeacoustics.com tried to come up with **Wood Diffuser Panel** with a good technical performance, whose size does not hinder its application, and that is a solution to most types of rooms. This product is recommended for music audition rooms or music rehearsal rooms whose volumetric 3dimensions range, obviously by using the number of products in proportion to the space.
