

BIG TRIANGLE BASS TRAP (CORNER)

€ 249.00

Music audition rooms, conference room, cinema, studios, pubs, etc. All need a surface that is efficient at absorbing. **Bass traps** is meant to be mounted on the corner rooms. This product has been especially designed to be a main element in the construction of rooms. Acoustics panels from europeacoustics.com is built in a box, which has a membrane manufactured by us. **Acoustics Panels** performance panel, very easy-to-install. It was designed to absorb and reflex the incident sound on the back, front or side walls, reducing the low energy that is present in excessive levels at the point of hearing. Therefore, it reduces unwanted resonances and helps to accommodate and improve sound perception.

Category: [Acoustics bass traps panels](#)

PRODUCT DESCRIPTION

- double reinforced wood frame
- range absorption 75 Hz - 18000 Hz
- built in acoustics gap
- dimensions 1240/650/430mm
- weight 6 kg
- great density 100kg/m³ Superrock Rockwool absorption material
- professional design proven in acoustic room
- modern fabrics material
- environmentally friendly materials
- ease to instal fixing kit included
