

MEDIUM300 ACOUSTIC PANEL

€ 60.00

Acoustic Panels are designed with a rigid absorptive core and are broadband meaning they deal with the entire frequency range. Music audition rooms, conference room, cinema, studios, pubs, etc. All need a surface that is efficient at absorbing. **Acoustic Panel MEDIUM300** absorbs high frequencies, mounted on walls and ceilings. Panels especially designed to be a main element in the construction of rooms. **Acoustics Panels MEDIUM300** high performance panel, easy-to-install. It was designed to absorb and reflex the incident sound on the back, front or side walls, reducing the low energy that is present in excessive levels at the point of hearing. Reduces unwanted resonances and helps to accommodate and improve sound perception.

PRODUCT DESCRIPTION

- double reinforced frame structure
- dimensions 1200mm x 600mm x 35mm
- weight 3kg / panel
- built-in acoustics gap
- professional design proven in acoustic room
- range of absorption 200 Hz - 15000 Hz
- great density 100kg/m³ Superrock Rockwool absorption material
- modern high quality fabrics available
- environmentally friendly materials
- ease install panels walls fixing included

ABSORPTION COEFFICIENT:
